WORK EXPERIENCE

Marketing Designer — El Segundo, CA
Beta Agency — April 2025 - Present

- Led the design and development of a fully interactive leasing microsite for ASANA Partners' Seacliff Village (Huntington Beach, CA) using Next.js and React, combining brand storytelling with dynamic UX to secure property representation for Beta Agency.
- Designed and implemented immersive site plans and mapping experiences using JavaScript libraries and Mapbox APIs, integrating interactive elements to elevate stakeholder engagement and modernize traditional CRE marketing.
- Own and evolve the agency's Webflow website, overseeing layout systems, responsive behavior, typography standards, color hierarchy, and UX consistency to ensure a cohesive, brand-aligned digital presence.
- Developed and maintained brand-consistent marketing assets across email campaigns, social content, presentations, leasing materials, and digital collateral, supporting broker outreach and deal acceleration.
- Conceptualized and produced high-impact property brochures, pitch decks, and marketing presentations using Adobe Creative Suite (Illustrator, InDesign, Photoshop), translating complex data into compelling visual narratives.

Web & Digital Marketing Lead — Remote
Order of Merchants — January 2025 - Present

- Own and evolve high-performing Next.js and React marketing websites, delivering intuitive, brand-aligned experiences supported by strong Git workflows and reliable deployment processes.
- Lead digital marketing initiatives from visual concepting through launch and analytics integration (GA4, BigQuery, Looker Studio), turning brand strategy into measurable growth.
- Design and scale cohesive web ecosystems across Webflow, WordPress, Framer, Shopify, and MERN environments, applying structured typography, color systems, and layout frameworks to ensure visual consistency and strong UX.
- Incorporate motion, Lottie animations, and interactive UI elements to create polished, modern experiences, and utilize AI-assisted tools like Cursor and Claude Code to streamline front-end workflows, accelerate iteration, and maintain high design standards.

Lead Front-End Developer / Visual Design — El Segundo, CA
SCSI Media — September 2021 - April 2025

- Lead designer and developer of knowi.ai, an A.I. SaaS platform for interpreters and translators in partnership with the French software company, Blue Frog Robotics.
- Re-designed and developed interpreting.com, the #1 online interpreting school in California and Nevada. Created new user navigation for on line courses and general front-end for the school's main website.
- Crafted visually compelling graphics for web pages, social media, newsletters, and online advertisements utilizing Adobe Photoshop and Illustrator, elevating brand identity and online presence.
- Designed the UI/UX for the SCSI Testing Tablet MKII, a secure remote assessment system used to evaluate military linguists deployed in Afghanistan and worldwide.
- Produced professional promotional videos using After Effects, Premiere Pro, and FCPX, including animations and motion graphics that enhanced client visibility and engagement.
- Developed high-impact, print-ready designs for exhibition booths, business cards, apparel, flyers, and banners using Illustrator, ensuring cohesive branding across all materials. Created and modernized logos for various projects and companies, including full brand books.
